

GREENWICH POINT DERMATOLOGY

OMNILUX LED THERAPY

PRE-TREATMENT INSTRUCTIONS

- LED light therapy can be used safely when pregnant and/or breastfeeding.
- We provide protective eye goggles to protect the eyes during your treatment.
- Avoid wearing makeup the day of treatment.
- Note that while your at-home LED device can be effective, it is not nearly as powerful as our in-office medical-grade LED system.

POST-TREATMENT INSTRUCTIONS

- Minimal redness can be noted immediately after the treatment but this resolves within hours.
- Makeup and sunscreen can be applied immediately after unless otherwise recommended.
- You can resume normal activities immediately.
- While some notice improvement after 1 session, most will see results within 2-4 weeks, with the best results after twice weekly sessions for 4-12 weeks.

If you have any questions or concerns, please call our office at 203.764.2230.
